JOINT PROGRAM EXAMINATION RULES
EFFECTIVE SEPTEMBER 2023

The Joint Program Examination consists of two written examinations which cover topics from certain graduate courses in Linear Algebra and Analysis.

The names of these examinations are as follows:

Linear and Numerical **Linear** Algebra

Mathematical Analysis

A detailed list of topics for either examination is provided by the Joint Program Committee, and will be posted on-line.

The examination for each part is 3 1/2 hours long. These examinations are held on different days of the same week in May and September of each year. Each department may specify the time limit for students in their department.
