

Departmental List of Publications for the Year 2000

- [1] Alexander Blokh and Michał Misiurewicz. Typical limit sets of critical points for smooth interval maps. *Ergodic Theory Dynam. Systems*, 20(1):15–45, 2000.
- [2] Alexander M. Blokh, John C. Mayer, and Lex G. Oversteegen. Recurrent critical points and typical limit sets for conformal measures. *Topology Appl.*, 108(3):233–244, 2000.
- [3] J. J. Buckley and Aimin Yan. Fuzzy functional analysis. I. Basic concepts. *Fuzzy Sets and Systems*, 115(3):393–402, 2000.
- [4] James J. Buckley and Thomas Feuring. Evolutionary algorithm solution to fuzzy problems: fuzzy linear programming. *Fuzzy Sets and Systems*, 109(1):35–53, 2000.
- [5] James J. Buckley and Thomas Feuring. Fuzzy differential equations. *Fuzzy Sets and Systems*, 110(1):43–54, 2000.
- [6] James J. Buckley and Thomas Feuring. Linear and non-linear fuzzy regression: evolutionary algorithm solutions. *Fuzzy Sets and Systems*, 112(3):381–394, 2000.
- [7] James J. Buckley and Thomas Feuring. Universal approximators for fuzzy functions. *Fuzzy Sets and Systems*, 113(3):411–415, 2000.
- [8] N. Chernov. Entropy values and entropy bounds. In *Hard ball systems and the Lorentz gas*, volume 101 of *Encyclopaedia Math. Sci.*, pages 121–143. Springer, Berlin, 2000.
- [9] N. Chernov. Statistical properties of chaotic systems in high dimensions. In *Dynamics: models and kinetic methods for non-equilibrium many body systems (Leiden, 1998)*, volume 371 of *NATO Sci. Ser. E Appl. Sci.*, pages 201–214. Kluwer Acad. Publ., Dordrecht, 2000.
- [10] N. Chernov, R. Markarian, and S. Troubetzkoy. Invariant measures for Anosov maps with small holes. *Ergodic Theory Dynam. Systems*, 20(4):1007–1044, 2000.
- [11] N. Chernov and L. S. Young. Decay of correlations for Lorentz gases and hard balls. In *Hard ball systems and the Lorentz gas*, volume 101 of *Encyclopaedia Math. Sci.*, pages 89–120. Springer, Berlin, 2000.
- [12] David Damanik and Günter Stolz. A generalization of Gordon’s theorem and applications to quasiperiodic Schrödinger operators. *Electron. J. Differential Equations*, pages No. 55, 8 pp. (electronic), 2000.
- [13] W. D. Evans and Yoshimi Saitō. Neumann Laplacians on domains and operators on associated trees. *Q. J. Math.*, 51(3):313–342, 2000.
- [14] F. Gesztesy, K. Unterkofler, and R. Weikard. On a theorem of Halphen and its application to integrable systems. *J. Math. Anal. Appl.*, 251(2):504–526, 2000.
- [15] M. Griesemer. A minimax principle for eigenvalues in spectral gaps. In *Differential equations and mathematical physics (Birmingham, AL, 1999)*, volume 16 of *AMS/IP Stud. Adv. Math.*, pages 175–179. Amer. Math. Soc., Providence, RI, 2000.
- [16] Lorenz Halbeisen and Norbert Hungerbühler. An application of van der Waerden’s theorem in additive number theory. *Integers*, pages A7, 5 pp. (electronic), 2000.
- [17] Lorenz Halbeisen and Norbert Hungerbühler. Dual form of combinatorial problems and Laplace techniques. *Fibonacci Quart.*, 38(5):395–407, 2000.
- [18] Lorenz Halbeisen and Norbert Hungerbühler. On periodic billiard trajectories in obtuse triangles. *SIAM Rev.*, 42(4):657–670 (electronic), 2000.
- [19] Yulia E. Karpeshina. On the density of states for the periodic Schrödinger operator. *Ark. Mat.*, 38(1):111–137, 2000.
- [20] Ian Knowles. Coefficient identification in elliptic differential equations. In *Direct and inverse problems of mathematical physics (Newark, DE, 1997)*, volume 5 of *Int. Soc. Anal. Appl. Comput.*, pages 149–160. Kluwer Acad. Publ., Dordrecht, 2000.
- [21] S. Macías, L. G. Oversteegen, and M. P. Widener. Confluent images of the hairy arc. *Topology Appl.*, 105(3):261–283, 2000.
- [22] M. N. Nkashama. Dynamics of logistic equations with non-autonomous bounded coefficients. *Electron. J. Differential Equations*, pages No. 02, 8 pp. (electronic), 2000.
- [23] Wolfgang Reichel and Henghui Zou. Non-existence results for semilinear cooperative elliptic systems via moving spheres. *J. Differential Equations*, 161(1):219–243, 2000.

- [24] Yoshimi Saito. The limiting equation for Neumann Laplacians on shrinking domains. *Electron. J. Differential Equations*, pages No. 31, 25 pp. (electronic), 2000.
- [25] N. Simányi. Hard ball systems and semi-dispersive billiards: hyperbolicity and ergodicity. In *Hard ball systems and the Lorentz gas*, volume 101 of *Encyclopaedia Math. Sci.*, pages 51–88. Springer, Berlin, 2000.
- [26] Nándor Simányi and Domokos Szász. Non-integrability of cylindric billiards and transitive Lie group actions. *Ergodic Theory Dynam. Systems*, 20(2):593–610, 2000.
- [27] Robert Sims and Günter Stolz. Localization in one dimensional random media: a scattering theoretic approach. *Comm. Math. Phys.*, 213(3):575–597, 2000.
- [28] Brian Smith and Gilbert Weinstein. On the connectedness of the space of initial data for the Einstein equations. *Electron. Res. Announc. Amer. Math. Soc.*, 6:52–63 (electronic), 2000.
- [29] Günter Stolz. Non-monotonic random Schrödinger operators: the Anderson model. *J. Math. Anal. Appl.*, 248(1):173–183, 2000.
- [30] James Robert Ward, Jr. Bifurcation of bounded solutions of ordinary differential equations. *J. Korean Math. Soc.*, 37(5):707–720, 2000.
- [31] R. Weikard. Floquet theory for linear differential equations with meromorphic solutions. *Electron. J. Qual. Theory Differ. Equ.*, pages No. 8, 6 pp. (electronic), 2000.
- [32] R. Weikard. On commuting differential operators. *Electron. J. Differential Equations*, pages No. 19, 11 pp. (electronic), 2000.
- [33] Henghui Zou. On positive solutions for semilinear elliptic equations with an indefinite non-linearity via bifurcation. *J. Partial Differential Equations*, 13(2):133–150, 2000.
- [34] Henghui Zou. Symmetry of ground states for a semilinear elliptic system. *Trans. Amer. Math. Soc.*, 352(3):1217–1245, 2000.
