

THE GOOD
THE BAD
& THE UGLY

OF DATA MANAGEMENT

The CCTS Data Management Workshop Series is offered at least once a year. In addition to building skills that support effective research, this series will prepare you for policy changes requiring data management plans as a condition for publishing in many academic medicine journals as of 2019.

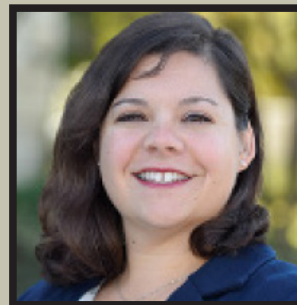

Key Topics Include

- The complete research data management life cycle
- Best research data management practices – creating a plan, exercising version control, building meta data files, and data cleaning
- Case studies in research data management
- Research data management resources – DMP Tool, REDCap

DATA MANAGEMENT EXPERTS

David Redden, PhD
Co-Director, CCTS BERD
Vice Chair, Department of
Biostatistics
UAB School of Public Health

Dorothy Ogdon, MSIS
Assistant Professor
