Self-Service Access to Study Enrollment Feasibility via i2b2

i2b2 (Informatics for Integrating Biology and the Bedside) is a self-service tool implemented within UAB and available to UAB personnel via BlazerID. The i2b2 repository contains detailed information on UAB patients, drawn from the UAB electronic health record and Enterprise Clinical Data Warehouse.

Analyst-Facilitated Access to Retrospective Data via i2b2

With appropriate regulatory approvals, data analysts partner with investigators to run detailed i2b2 queries that can support epidemiologic study as well as to enable recruitment for clinical research initiatives.
