The Center for Clinical and Translational Science (CCTS) Presents:

“This is How We Role” Introducing Veterinary Careers to Elementary School Children

**Tuesday, May 19, 2026
12-1 PM (CT), via Zoom**

Join us for the May CCTS ExpeDITions Forum, part of a monthly series highlighting how dissemination and implementation science is applied across clinical, community, and public health settings. This session will explore implementation strategies in pediatric and childhood populations through the **VetaHumanz** initiative.

Dr. Athema Etzioni, from Tuskegee University, will share how this innovative, community-engaged program introduces young learners to veterinary careers while promoting health literacy and expanding pathways into the profession. Attendees will gain insight into how creative, role model-driven approaches can support early engagement and broaden participation in the health workforce.
