

Translational Research
SUMMER SERIES

Wednesdays
3:30 PM - 4:30 PM
Sessions held Via Zoom

Session Date	Session Title	Speaker/Presenter
June 5th, 2024	What is Translation? (Intro) / Optimizing the Research Question	Jennifer Croker, PhD / Timmy Lee, MD
June 12th, 2024	Study Design, Analytic Methods & Data Management/ Introducing Clinical Trials	David Redden, PhD / George Solomon, MD
June 19th, 2024	Juneteenth Holiday Break	
June 26th, 2024	Epidemiology/Population – Public Health/EHR Data Access	Amanda Anderson, PhD/R. Dale Johnson, MS
July 3rd, 2024	Fourth of July Holiday Break	
July 10th, 2024	Team Science: Building Effective Translational Teams	Joel Dobbs, PharmD
July 17th, 2024	Community-Engaged Research/ D&I considerations at each Translational stage	Kimberly McCall, PhD / Larry Hearld, PhD
July 24th, 2024	Spreading Your Message: Learning The Art of Scientific Writing	John Higginbotham, PhD
July 31st, 2024	Been There, Done That: I Can Tell You All About The Career Journey	Carlos Cardenas, PhD / Samantha Martin, PhD

Vision

The Translational Research Summer Series program provides precursory skill training for scientists and research professionals who are in the formative stages of their translational research careers. The Summer Series will create a foundation that will prepare students for success.

Series Description

The Translational Research Summer Series is a program designed for those interested in advancing their knowledge of translational research. The program covers topics such as biostatistics, epidemiology, community research, and team science, and are taught by experienced faculty and senior leaders. Participants will gain key skills that can be applied to their academic and professional endeavors.
