

Psychiatry and Behavioral Neurobiology

.....

UAB OFFICE OF PSYCHIATRIC CLINICAL RESEARCH

Currently Enrolling Studies

Phone: 205-934-2484

Non-Treatment Studies:

- Micro RNA (miRNA) Regulation in **Depressed** Adolescents with and without Suicidal Ideation
- Psychiatric Biological Samples
 Repository
- Oxidative Stress Mechanisms in Mood Disorders

Currently Enrolling Treatment Studies:

- Plasma Exosomal MicroRNAs as Promising Novel Biomarkers for Suicidality and Treatment Outcome
- A Phase 3, Multicenter, Randomized, Double-blind, Placebo-controlled Trial to Evaluate the Efficacy, Safety, and Tolerability of Brexpiprazole as Adjunctive Therapy in the Maintenance Treatment of Adults With Major Depressive Disorder.
- Augmentation versus Switch: Comparative Effectiveness Research Trial for Antidepressant Incomplete and Nonresponders with Treatment Resistant Depression

Treatment Studies Opening Soon:

 NeuroRx Acute Stabilization (NRX-100 vs.
 Placebo) for Treatment of Acute Suicidal Ideation and Behavior in patients with Severe Bipolar Depression

A Randomized, Double-blind, Multicenter, Placebo-controlled Study to Evaluate the Efficacy, Safety, and Tolerability of Esketamine Nasal Spray, Administered as Monotherapy, in Adult Participants with Treatment-resistant Depression

Multicenter, Double-Blind, Randomized, Parallel-Group Study with Quetiapine Extended Release as Comparator to Evaluate the Efficacy and Safety of Seltorexant 20 mg as Adjunctive Therapy to Antidepressants in Adult and Elderly Patients with Major Depressive Disorder with Sleep Disturbance Who Have Responded Inadequately to Antidepressant Therapy

Treatment Studies Opening Soon:

 A Phase II, 6-week, multicenter, randomized, double-blind, double-dummy, placebo-controlled, parallel group trial with a quetiapine arm to evaluate the efficacy, tolerability and safety of oral BI 1358894 in patients with Major Depressive Disorder with inadequate response to antidepressants.

RECOVER: A Prospective, Multi-center, Randomized Controlled Blinded Trial Demonstrating the Safety and Effectiveness of VNS Therapy® System as Adjunctive Therapy Versus a No Stimulation Control in Subjects With Treatment-Resistant Depression
