

## **The UAB Department of Pediatrics announces the 2019 Russell Cunningham Memorial Research Program**

This program was established by Dr. Sergio Stagno, Chair Emeritus of the UAB Department of Pediatrics, to honor the memory of Dr. Russell Cunningham. Dr. Cunningham spent more than 30 years as a member of the faculty and was a fervent advocate for medical education. The Cunningham program is designed to introduce students to pediatrics through research and clinical experience.

UASOM Medical Students with an interest in Pediatrics are encouraged to apply for this eight-week summer internship and research program. Based on these applications, two students will be selected and will work with faculty mentors from the Department of Pediatrics. Faculty mentor responsibilities include 1) helping the student design a summer research project; and 2) providing the student with clinical experience. This may include observation or participation in clinical activities (clinics or hospital rounds) or attendance at educational conferences. Each student will receive \$4000; an additional \$1000 is available to cover costs of travel to present the research.

### **ELIGIBILITY:**

UASOM Medical Students in their first year of medical school are eligible to apply.

Eligible projects include bench research, clinical research, and quality improvement projects. All projects should be designed for completion within the 8-week summer research internship time frame, or enough progress made such that finalization can occur during a scholarly activity block. Suggestions for projects in which this can be accomplished include: analysis of existing data from an ongoing project to answer a new research question or expansion of an existing project to examine a new but related question. New projects which can be accomplished within the internship time frame are also encouraged. Each student must have his/her own project; funding is not available for students to work as a research assistant on an existing project.

Faculty mentors **MUST** be in the Department of Pediatrics.

### **APPLICATION PROCESS**

The following materials should be submitted:

1. Student's CV or resume (no longer than 3 pages)
2. Students should compose a 1-2 page description of the project idea, including specific goals and what the student would like to accomplish by receiving this award. Inclusion of a research hypothesis is optional. This description should be reviewed by the faculty mentor prior to submission to the committee.

Applications must be submitted by February 18, 2019 to Clare Mallette, [cmallette@peds.uab.edu](mailto:cmallette@peds.uab.edu). Recipients will be announced the first week of March.
