RSNA Gold Medalist

Professor Emeritus and former chairman of UAB Radiology, **Robert J. Stanley, M.D., F.A.C.R.**, is a Gold Medalist recipient of RSNA's highest honor. The award will be presented to him during the 102nd Radiological Scientific Assembly and Annual Meeting.

As a lead authority in the early development of body CT imaging, Dr. Stanley is known globally for his lectures on body imaging and is the author of over 180 scientific publications. Dr. Stanley's leadership and commitments continue to be recognized nationally, as well as his mentoring legacy of multiple national leaders.

In addition to being named a RSNA Gold Medalist this year, he is a former recipient of the American Roentgen Ray Society (ARRS) Gold Medal, 2014 Society of Computed Body Tomography and Magnetic Resonance (SCBT-MR) Gold Medal, and the 2014 Walter B. Cannon Medal for distinguished contributions

by the Society of Abdominal Radiology (SAR).

As a world-renowned abdominal radiologist, it is a true honor for him to have served for 32 years in the Radiology Department at UAB. The announcement will be made at the the RSNA meeting's plenary session on Tuesday, November 29, 2016 at 1:30 p.m. in Chicago, Illinois.

Farewell, Dr. Koehler!

Robert E. Koehler, MD, FACR retired August 26, 2016 from UAB's Department of Radiology, where he has served on its faculty since 1982.

Dr. Koehler obtained his medical degree from Cornell University Medical College, followed by an internal medicine residency at Barnes Hospital at Washington University School of Medicine. He transitioned to radiology and completed his residency at the University of California San Francisco (UCSF), where he subsequently completed a fellowship in gastrointestinal radiology. Dr. Koehler remained on the faculty at UCSF before joining the faculty at Mallinckrodt Institute of Radiology at Washington University School of Medicine. UAB was fortunate when Dr. Robert Stanley, former chair, was able to recruit Dr. Koehler.

Dr. Koehler is one of the true forefathers of gastrointestinal fluoroscopy, and his retirement will leave a huge void in this arena. However, because of his tireless years of giving back, he has taught and mentored a remarkable number of successful radiologists, many of whom have led successful academic careers, several in the field of gastrointestinal imaging.

Dr. Koehler's awards are innumerable. He was awarded membership in Alpha Omega Alpha, and has received countless teaching awards, reflecting his ongoing contributions to the field. He served as an ABR board examiner for almost 30 years. Additionally, his service at UAB includes serving as the diagnostic radiology residency program director for 12 years, and serving as the department chair for almost six years. He was viewed as a fair and wise leader and many continue to look to him for advice.

Although it saddens us to see him go, we wish him well on the next phase of his life with his lovely wife Barbara and their children and grandchildren.

Congratulations, Dr. Morgan!

Vice Chair of Education and Program Director of the Diagnostic Radiology Residency Program, **Desiree Morgan, M.D.**, received the 2nd Annual Brewer-Heslin award during the 2016 UAB School of Medicine's White Coat Ceremony. This award is presented to a full-time faculty member who exemplifies professional qualities; as well as dedication to provide compassionate and highly skilled medical care to patients, respecting all members of the health care team, and sharing knowledge with physicians in training, the public, and patients.

Congratulations, Dr. Yester!

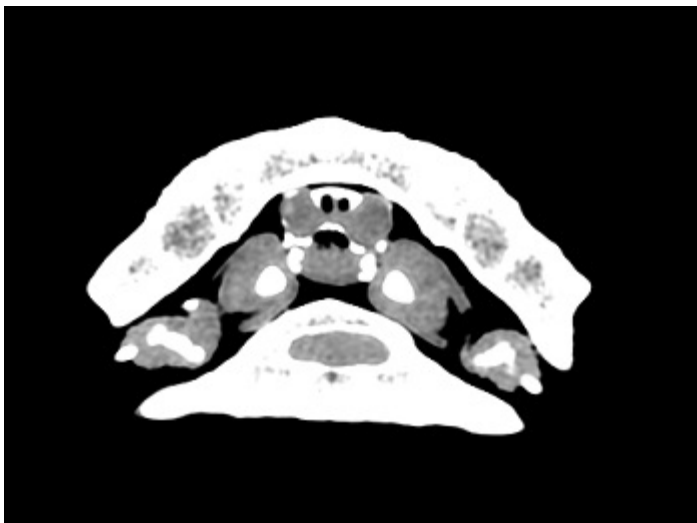

The American Association of Physicists in Medicine (AAPM) awarded **Michael Yester, PhD**, Director of UAB Physics and Engineering, the Edith Quimby Lifetime Achievement Award for his outstanding contributions to Medical Physics. This prestigious award recognizes AAPM members with notable careers and outstanding achievements in medical physics. The award was presented at the AAPM Annual Meeting in Washington, DC. The AAPM supports Medical Physics with a focus on improving safety, and efficacy of radiation oncology to advance patient care through education and research.

Standard-of-Care Clinical Treatment with the PET/MR Imaging Machine

Located in UAB's Advanced Imaging Facility (AIF), the new PET/MR is an additional state-of-the-art piece of equipment conjoining with UAB's T-24 cyclotron and two PET/CT scanners to further the diagnosis and effective treatments for our patients. With positron emission tomography providing physiologic data, along with magnetic resonance delineating exquisite anatomy, a powerful tool is created. UAB's AIF has been a transformative project for healthcare at UAB.

Giving to Radiology

Our Goal: Over the next five years, we hope to raise \$500,000. Please read about our leadership and education funds and consider contributing.

The **Robert J. Stanley, M.D. Leadership Fund** is appropriately named in honor of Dr. Stanley’s many decades of leadership. We have begun incorporating a Business & Leadership Conference curriculum for our residents, designed to provide additional opportunities for in depth leadership training. As healthcare is undergoing monumental changes, we must invest in the training of our future leaders in order for the specialty of Radiology to remain viable. Therefore, funds received will provide opportunities for leadership development for trainees and faculty.

The **Robert E. Koehler, M.D. Education Fund** is named in honor of Dr. Koehler’s lifelong educational accomplishments. The first project will be a new learning laboratory for our trainees. The need to expand our curricular offerings is vital in preparing our residents to be well-rounded radiologists for the future.
