

Location(s) of standing order use: MRI Departments of UAB Hospital & Ambulatory Clinics

**MRI Standing Orders:**

Hyoscyamine Administration for Use as Diagnostic Aid for Pelvic MRIs

**Implementation Criteria:** Patient scheduled for pelvic MRI or pelvic PET/MRI arrives for testing in MRI Department.

**Personnel Authorized to Implement:** MRI or PET/MRI Technologist or Registered Nurse in the Department of Radiology

**Orders:**

1. Verify patient per the Patient Identification policy.
2. Verify provider's orders for pelvic MRI or PET/MRI and explain procedure to patient.
3. Verify patient's allergies. If no allergy to hyoscyamine exist, administer hyoscyamine 0.25 mg SL (2 tablets of 0.125 mg dosage) immediately prior to MRI. If an allergy to hyoscyamine exists, do not administer hyoscyamine.
4. Evaluate patient for any side effects prior to release following testing.
5. Contact abdominal MRI attending if any side effects/patient complaints.
