ALABAMA AT BIRMINGHAM

Knowledge that will change your world

GBS 724 02-05-16

Working with the data

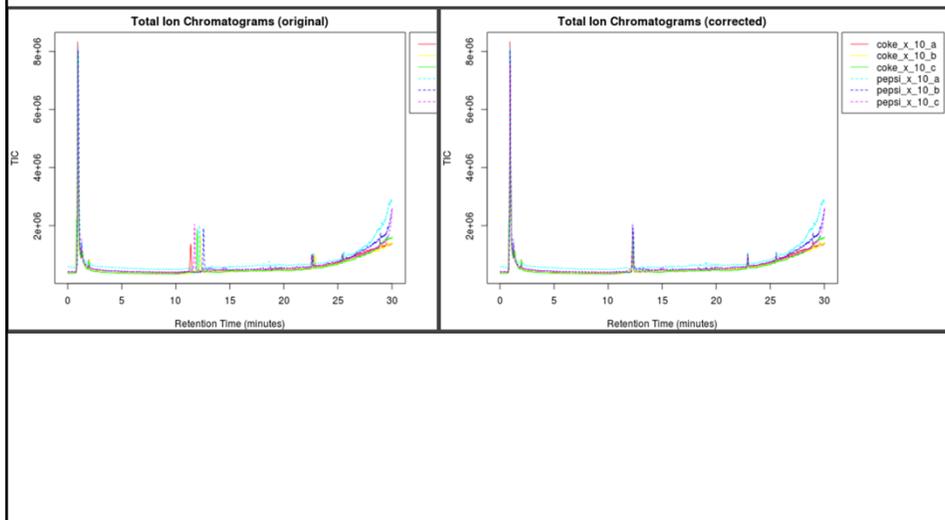

Steve Barnes, PhD

Examining output on XCMS

- **First, we'll logon to XCMS and inspect two datasets**
 - Coke via Pepsi
- **Then we'll look at the second dataset**
 - Non-irradiated diet vs irradiated diet
- **We'll download the XCMS output file**
 - Make a Volcano plot
 - Prepare files for MetaboAnalyst

Rt correction - Coke vs Pepsi

Let's go to XCMSOnline

Datasets Used

- Grubbs_Irradiat (108909)
- Grubbs_NonIrrad (109003)

Synopsis

- Downloading data files from XCMSonline
- Opening the .zip file
- Creating the Excel file from result.tsv file
- Why a Volcano plot?
 - Making a volcano plot
 - Using a macro?
- MetaboAnalyst

- Copy the median m/z and median Rt values into a new Excel file. Then copy the column of areas from the first sample in Group_1. Save as an Excel .csv file.
 - Note that the file name must not have spaces – use an underscore instead of a space.
- Leave the file open and replace the yellow column with the areas from the next Group_1 sample. Save as a second .csv file.
- Continue until all Group_1 and Group_2 samples have a corresponding .csv file.

Preparing a .zip file

- Put each of the .csv files for group_1 samples into a folder named “Group_1”.
- Put each of the .csv files for group_2 samples into a folder named “Group_2”.
- Click on Group_1 and Group_2 folders and combine to form a .zip file.
 - Rename the .zip file as [your_name].zip
- You’re now ready to submit it to MetaboAnalyst
