

REQUEST FOR PILOT/FEASIBILITY PROJECT AWARDS

Release Date
March 25, 2026

Submission Deadline
April 30, 2026

Start Date
June 1, 2026

PROGRAM DESCRIPTION

UAB's Nathan Shock Center of Excellence in the Basic Biology of Aging announces the availability of pilot/feasibility (P/F) project awards for early-stage investigators who have the goal of future funding from the National Institutes of Health/National Institute on Aging (NIH/NIA). The P/F studies may focus on any area of aging research that can be supported by one or more of the [UAB Nathan Shock Center Research Cores](#), with priority given to those examining hallmarks and/or bioenergetics of aging. Basic Alzheimer's disease studies are eligible if they contain clear focus on the basic biology of aging rather than Alzheimer's disease specifically.

The pilot program will provide total awards of **up to \$35,000**. We anticipate awarding approximately three projects, depending on the budgets and number of fundable applications. Project periods will be one year; however, carry-forward will be considered, pending satisfactory progress and justification. Applicants **MUST** utilize at least one of the [UAB Nathan Shock Center Research Cores](#), as described in the [Research Cores website pages](#).

Co-funding may be sought through partners in the network of [National Nathan Shock Centers](#) at more than one institution as part of one application. Each applicant **MUST** consult with Research Development Core leaders to provide directions in utilizing local UAB and National Nathan Shock Center Cores. Please see application submission contacts below.

ELIGIBILITY

The awards are intended to support [NIH-eligible](#) scientists to obtain extramural funding for aging research. We particularly encourage applications from early stage investigators ([as defined by NIH](#)) and advanced post-docs, who are eligible for F-awards, K-awards, or other career development awards. *Early-stage investigators and postdocs without prior training or expertise in basic aging biology research are required to identify an established researcher to provide a strong letter of support and/or mentoring plan.* Questions about eligibility may be directed to athalack@uab.edu or should be discussed during the initial consultation.

CRITERIA FOR REVIEW

Emphasis will be placed on scientific merit and integration with the UAB [Nathan Shock Center mission](#). Applications will be reviewed by experts in the field of aging biology. Proposals will be evaluated on the basis of:

1. Significance, methodological approach/feasibility, scientific merit, and innovation.
2. Relevance to the Nathan Shock Center mission and use of Nathan Shock Center Cores.
3. Potential to result in subsequent larger NIH/NIA funded projects. There is a separate section in the application to justify the project by outlining how the pilot will provide data that are needed for the larger grant application.

ALLOWABLE COSTS

1. The proposed budget must be fully justified for how the funds will directly advance the project specific aims. While \$35,000 is the maximum budget, lesser amounts should be requested as appropriate and justified by the project aims and scope.
2. Allowable costs only include Core services and supplies relevant to the services provided.

REQUIRED DOCUMENTATION & GUIDELINES

Please follow the guidelines. Incomplete proposals or those not following the guidelines shown below will not be reviewed. Interested applicants are **required to consult** with the UAB Nathan Shock Center **Research Development Core**, and may reach them by email, CAS-nscgrants@uab.edu. **Consultations are *in lieu of a letter of intent*** and serve as the first step toward preparing an application. Applications submitted without prior consultation may not be reviewed.

Formatting requirements:

1. All text should be written in Arial 11-point font with 0.5 margins (top, bottom, left, right).
2. Figures and tables should not contain text with font sizes below 9 points.
3. Final grant proposal document should be submitted as a single PDF file.
4. The itemized budget should be included as part of the PDF.

Required documents and page limits:

1. PROPOSAL FACE PAGE (1 page maximum)
 - 1.a. Proposal title
 - 1.b. PI/PIs -- name, degree, position, academic institution, department/unit
 - 1.c. Proposal Abstract (30 lines maximum)
2. PROPOSAL APPROACH (4 pages maximum)
 - 2.a. Specific Aims (1 page maximum)
 - 2.b. Research Plan (3 pages maximum)
3. BUDGET & BUDGET JUSTIFICATION (2 pages maximum), including a brief summary of consultations with the cores, and the resulting scientific and budgetary justification for the work proposed to be conducted by the cores.
4. BIOSKETCHES (PI/PIs and)
5. REFERENCES (1 page maximum of relevant bibliographic references)
6. LEVERAGING THE PILOT PROJECT FOR ADDITIONAL FUNDING. Statement about the timeline and anticipated sources of publications and additional funding (e.g., NIA R01, F-award, K-award and/or other) that the applicant/awardee could acquire with successful completion of their Pilot Project.

Applications will be accepted between April 1 and April 30. Instructions for submitting applications will be provided on the UAB NSC website by April 1, 2026.

Application Submission Contacts:

The UAB Nathan Shock Center Research Development Core (RDC) administers the Pilot Grant Program and is the primary point of contact for interested applicants. Initial inquiries and/or questions during the application process should be directed to CAS-nscgrants@uab.edu and cc: athalack@uab.edu.
