WHAT IS THE CAREER CENTER CANVAS COURSE?

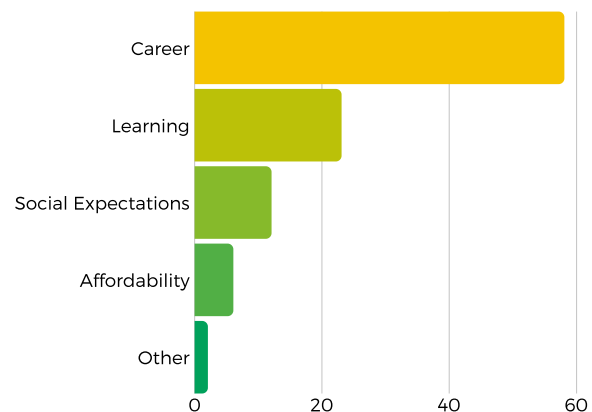

To assist with integrating career content within the classroom, the UAB Division of eLearning and Professional Studies (eLearning) and the UAB Career Center within the Division of Student Affairs have designed a series of modules UAB faculty and instructors can add to their existing Canvas courses. These modules complement the great work happening in the classrooms and research labs across campus. Faculty and instructors are encouraged to utilize these modules as assignments and follow-up with a career-related workshop offered through the UAB Career Center.

According to a 2018 Gallup survey titled "Professors Provide Most Valued Career Advice to Grads.", students are increasingly seeking career advice and support from academic partners across campus. Through this Canvas course, the Career Center seeks to empower those campus partners in embedding this support into curriculum.

Further, career outcomes is an ever growing decision factor for students when seeking higher education. According to a 2018 Gallup poll "Why Higher Ed?", 58% of students indicated they chose to pursue a degree at a college or university to increase their career prospects following graduation. This response was followed by "Learning and Knowledge" at 23%, "Family/Social Expectations" at 12%, "Access/Affordability" at 6%, and "Other" at 2%.

MAIN REASON FOR CHOOSING EDUCATION LEVEL:

The UAB Career Center Canvas Course was designed with integration and collaboration as a goal. Through this Implementation Guide, we will walk you through the course content, best practices, implementation, support, and FAQs. We hope you will consider integrating this content into your courses and utilizing these modules with your students regularly. The clearer the connection between campus and career, the more our students succeed.
